Pre-requisites for working with GitHub on local machine:

BASH Installation

For Windows:

[GitBash Installation](#)

For Linux/Unix:

For Linux systems installing Git is easy. If you are using a Debian-based distribution like Ubuntu, you can use apt install:

$ sudo apt install git-all

For Fedora, RHEL or CentOS, you can use:

$ sudo dnf install git-all

For Mac:

Open the Terminal

Install homebrew if you don't already have it, then:

$ brew install git

SSH Key generation

[Generate SSH Key](#)
